

# Brazilian Soybean Meal

**Brazilian soybean meal** is a high-quality byproduct of soybean oil extraction, rich in protein and essential nutrients. It is widely used as animal feed and in various industrial applications due to its excellent nutritional profile and high digestibility.

## Specifications:

Average Return Percentage:	78.5% of net weight received for industrialization
Protein Content:	Minimum 45% (AOCS Ba 4d-90)
Fat Content:	Maximum 2% (AOCS Ba 3-38)
Moisture Content:	Maximum 12.5%, excess maximum 13% (AOCS Ba 2a-38)
Fiber Content:	Maximum 7%, maximum 1% excess (AOCS Ba 6-84)
Ash Content:	Maximum 7% (AOCS Ba 5a-49)
Urea Activity:	Maximum 0.5 (AOCS Ba 9-58)
Free of Castor Bean and/or Castor Husk	
Minimum Protein Solubility:	78%
